SKILLS & TECHNOLOGIES

Web Dev	HTML, Javascript, ReactJS, PHP, Flask
Databases	Mysql, Sqlite3, SQLAlchemy
Programming Langs/Data Format	C++, Python, JSON, YAML
Data Analytics	Tableau, Python for Data Analytics, MS Excel , PowerBI
Tools	Git, Jira, Trello, Filezilla, Postman, Figma, Photoshop, Canva
AWS	EC2, ECR, S3, EKS, RDS, CloudWatch
Deployment	Docker, Kubernetes, Github Actions (CI/CD), Ansible

EDUCATION

- **BE in Information Technology Engineering**, Goa College of Engineering (2021 - 2025), CGPA: 8.3
- **Honors in Data Science**, Goa College of Engineering (2022 – 2025)

PROJECTS

- **AI-powered Surveillance and Intrusion Detection for 6 Technical Training Regiment (Indian Army)**
 - **Role:** Project Member (IoT Engineer, AI Engineer, Web Designer) | **Team Size:** 3
 - **Problem Statement:**
Traditional surveillance systems lack automation, real-time monitoring, and AI-driven authentication, making military border security vulnerable to unauthorized access and intrusions.
 - **Proposed Solutions:**
 - **Two-Factor Authentication:** Implementing **OCR-based ID card scanning and face recognition** for personnel verification.
 - **Intrusion Detection:** Developing an **IoT-driven system** with **YOLOv8** for real- time border surveillance, integrating night-vision capabilities.
 - **Vehicle Authorization:** Using **OCR-based number plate verification** against a secure database.
 - **Technologies Used:** Raspberry Pi, React.JS, Python, YoloV8, Tesseract OCR, HaarCascade Classifier, DeepFace Engine, Flask, Jira, Git, GitHub.
- **DevLog – Developer Journal & Code Snippet Manager**
 - **Role:** Full Stack Developer | **Team Size:** 3
 - **Problem Statement:**
Developers lack a unified system to store coding notes, manage logs, and organize reusable code snippets, leading to inefficient search, retrieval, and knowledge sharing.
 - **Proposed Solutions:**
 - Designed a **REST-based knowledge management** system supporting Markdown entries, code snippets, fuzzy search, and structured filtering.
 - Implemented **JWT-secured** user management with versioned APIs, **CLI-based export tools (Markdown/JSON)**, and auto-generated metadata using **LLM (gemini-flash-2.0)**.
 - Deployed the application using **Docker, CI/CD pipelines, and AWS (EC2 + RDS)**, integrating a **React-based frontend** for user interaction.
 - **Technologies Used:** Python, Flask, SQLAlchemy, MySQL, flask-JWT, PyTest, Pydantic, Rich, Argparse, Docker, AWS EC2/RDS, GitHub Actions, React, gemini, Postman.

EXPERIENCES

- **Persistent Systems Limited (Goa – India)**
 - **Role** – Software Engineer | **Duration:** Jan 26 – Currently
 - Working on IBM Cloud Vmware on developing celery, ansible and python based automation systems for cloud infrastructure
 - Working on python upgrades for microservice based cloud infrastructure
 - **Technologies Used:** Python, Flask, SQLAlchemy, MySQL, Docker, Kubernetes, Git, IBM Vmware, Ansible, YAML, celery, IBM Atlas.
- **Revature (Goa – India)**
 - **Role** – Software Engineer Trainee (Python API developer with React) | **Duration:** Oct 25 – Dec 25
 - Completed intensive training in **Python, Flask, MySQL, SQLAlchemy, JWT, PyTest, Pydantic, React, and cloud-native technologies (AWS, Docker, Kubernetes, Terraform, GitHub Actions)**, building RESTful APIs, implementing authentication, and following backend development best practices.
 - **Technologies Used:** Python, Flask, SQLAlchemy, MySQL, JWT, PyTest, Pydantic, Docker, Kubernetes, Terraform, AWS (S3/EC2/RDS/ECR/EKS), Git, GitHub Actions, React.
- **Anant Infomedia Pvt. Ltd. (Panjim - Goa)**
 - **Role** – Software Engineer Intern | **Duration:** July 25 – Oct 2025
 - **Saath7 – Patient Support Program (Sanofi):**
 - Developing and maintaining PHP-based data synchronization systems that securely transfer locally stored patient data into centralized databases, supporting diabetes care across 45 cities and over 5,000 doctors.
 - **Technologies Used:** PHP, JSON, APIs, HTML/CSS, FileZilla, Navicat MySQL, Bootstrap.
- **Codanto (Mala, Panjim - Goa)**
 - **Role** - Web Developer Intern | **Duration:** July 24 – August 24
 - Developed and maintained web applications including a **US-based charity donation platform** and a **local governance system**, implementing features for wishlist management, notifications, and issue tracking.
 - **Technologies Used:** SQL, APIs, HTML/CSS, Jira, Figma, Git, GitHub.

CERTIFICATIONS

- **IBM Containers & Kubernetes Essentials**, IBM Badge (2026)
- **Python with AI Competency Level - 1**, Persistent Systems (PDEA) (2026)
- **GenAI Foundation course**, Persistent Systems (PDEA) (2026)
- **Linux Crash Course**, Udemy (2026)
- **Deloitte Australia Data Analytics Job Simulation**, Forage job simulations (2025)
- **Data Structure and Algorithms Using Java**, NPTEL Online Certifications, IIT Kharagpur (2023)
- **The Joy of Computing with Python**, NPTEL Online Certifications, IIT Madras(2023)

EXTRACURRICULAR

- **Finalist | Spark-3 Hackathon, HackIndia** (March 2025)
Built an AI-powered PPT generator using **Gemini Flash 2.0** for content generation and the **PPTX Python library** for slide creation. Built on **React.js** and **Flask** based web platform.
- **TE Executive | Intensa Council, Goa College of Engineering** (2023 - 2024)
Have coordinated numerous technical events and played a pivotal role in the technical work in major college events like **Tandav** and **Spectrum**.

LANGUAGES KNOWN

- English, Hindi, Konkani, Marathi.
